Vision Systems, A Gauzy Company, Presenting Innovative Solutions for Shading & Ambiance Lighting at Aircraft Cabin Innovation Summit

SEPTEMBER 12-14, SEATTLE, USA

FOR IMMEDIATE RELEASE

[Brignais, FR – 29th August, 2023] - Vision Systems, a Gauzy Company, a market leading provider of shading and cabin ambiance solutions for the aviation industry, is proud to announce its participation at the RedCabin Aircraft Innovation Summit, world renowned for stimulating and driving new ideas that help shape the next generation of air travel.
With a commitment to take passenger wellbeing ever further, Vision Systems will highlight its complete solutions dedicated to airlines combining high-end shades and dimmable windows, that provide a unique passenger experience and airline brand differentiation.

The company has positioned itself at the forefront of innovation in the matter of natural light control and personalized experiences, with its cutting-edge shading solutions and ambiance management systems, already selected by designers for business aviation and by premium airlines.
Based on its 20 year's experience in shading systems and on its expertise in smart technologies, electronics, mechanics and composite, Vision Systems has developed a specific offer that meets airlines expectations in terms of passenger comfort and ease of installation and maintenance.

Vision Systems will present its commercial aviation product range including:

- Harmony shading solution, roller shade + dimmable window, providing perfect homogeneity for a sleek interior. This product will be showcased with a transparent touch panel.
- Cozy shading solution, pleated shade + dimmable window, offering an elegant style for a warm cocoon atmosphere
- Smart shading system SPD dimmable windows, segmented or not, a modern stylish solution to control natural light

These roller and pleated shades are also available in Dual version (translucent + opaque fabrics), and additional mood lighting can be integrated to enhance the personalization of passenger space.
