

PRESS RELEASE

Brignais, 5<sup>th</sup> May 2020 – for immediate release

## **VISION SYSTEMS LAUNCHES ANTI-COVID-19 GLASS TO PROTECT BUS AND COACH DRIVERS**

With regard to the COVID-19 pandemic that we have to face, Vision Systems relies on its Safety Tech division, specialized in driver assistance systems and driver protection doors, to develop a protective glass for bus and coach drivers, allowing to avoid possible transmission of the virus when in contact with passengers.

This polycarbonate partition, a durable, resistant and non-brittle material, is to be installed on an existing driver door. Its design is robust, it does not generate additional vibrations and its fixing system does not cause any deterioration on the lining or on the internal mechanisms of the door. Adaptable to all driver doors, this anti-COVID-19 glass, developed and assembled in France, can be mounted and dismantled simply and quickly, and requires very little maintenance (easy cleaning).
