

Ambiance Management

Shading & lighting synchronization

Passenger control of the lighting atmosphere

DISTINCTIVE DESIGN

Various light ambiances to enhance your cabin interior

BRAND DIFFERENTIATION

Stand out from the crowd with cutting edge technologies

UNIQUE PASSENGER EXPERIENCE

Control and personalization of their own space

Through a tablet or control panel, the passenger can select a “mood”, such as reading, sleeping or waking up, leading to the automatic synchronization of the shade, the dimmable windows and the mood lighting to create **the perfect adequacy between the selected mood and the lighting atmosphere**

EASY CONTROL

Individually with a control panel

Centralized through the Cabin Management System

Each element, the shade, the windows and the mood lighting, can be controlled separately or simultaneously through the ambiance management app

IN-HOUSE DEVELOPMENT

Complete solution based on Vision Systems’ expertise in shading systems and know-how in cabin management systems

OPTIONS

Roller or pleated fabric

Shade for one, two or three windows
